

Expanding Horizons, Empowering Independence

Sometimes, independence is not about moving from one place to another. It is about having the freedom to decide where you want to go, when you want to go, and how you want to participate in the world around you. The ability to travel farther, explore opportunities, and engage with the community can transform not just mobility, but confidence and quality of life.

For many persons living with spinal cord injury, navigating longer distances can be physically demanding and often limits access to education, employment, healthcare, social gatherings, and community participation. While a wheelchair provides mobility, greater independence often requires solutions that enable individuals to travel comfortably and efficiently over extended distances.

A NeoBolt is much more than an assistive device. By converting a manual wheelchair into a powered mobility solution, it enables users to travel longer distances with less physical effort, enhancing accessibility, independence, and participation in everyday life.

Recognizing this important need, Soulfree distributed **5 NeoBolts with Spare Batteries** to spinal cord injured beneficiaries through its Outreach Program during **March 2026**.

For many beneficiaries, receiving a NeoBolt means more than increased mobility—it means greater freedom to pursue aspirations, maintain social connections, access opportunities, and engage with the world on their own terms.

This meaningful intervention was made possible through the generous support of **Varian Medical Systems**. Their commitment to empowering persons with spinal cord injury has enabled beneficiaries to access innovative mobility solutions that promote independence, confidence, and inclusion.

At Soulfree, we believe that accessibility is not merely about reaching destinations—it is about creating opportunities for individuals to live active, meaningful, and self-directed lives. Access to the right assistive technology helps remove barriers and enables persons with disabilities to participate more fully in society.

Every NeoBolt distributed represents more than mobility—it represents freedom, opportunity, and the confidence to move beyond limitations.

We extend our heartfelt gratitude to **Varian Medical Systems** for partnering with us in creating meaningful change and supporting our mission to build a more inclusive and compassionate society.

The poster features the Soulfree logo (a stylized butterfly) and the text "OUTREACH in ACTION NEOBOLT DRIVE". It is sponsored by Varian Medical Systems. Below the title, there are five photographs of individuals using the NeoBolt device, each with their name underneath: DEVENDRA N, KAVIN RAJ A, SATHYAMOORTHY D, SELVI JAIRANI S, and VENGADACHALAM S. At the bottom, it says "FIVE INDIVIDUALS. COUNTLESS POSSIBILITIES." and "SPONSORED BY VARIAN MEDICAL SYSTEMS". A small graphic of a hand holding a heart is next to the text "A glimpse of greater independence, mobility, and opportunity." The bottom of the poster has the tagline "Creating Pathways to Independence" flanked by two heart symbols.
